

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-8. (Canceled)

9. (New) Electrical household food preparation appliance, comprising a motor housing, a work container provided to be placed on the motor housing, a lid provided to close the work container, the lid having a detection body provided to cooperate with a transmission element arranged in the work container when the lid is locked on the work container, the transmission element cooperating with a control element arranged in the motor housing to allow operation of the appliance when the lid closes the work container disposed on the motor housing, wherein the work container can be placed on the motor housing in several angular positions and in that the control element is mounted to be movable in rotation against a restoring means and has several detection cams arranged to cooperate with the transmission element.

10. (New) Electrical household food preparation appliance according to claim 9, wherein the control element forms a crown.

11. (New) Electrical household food preparation appliance according to claim 9, wherein the control element is mounted suspended to a body of the motor housing forming a pedestal for reception of the work container.

12. (New) Electrical household food preparation appliance according to claim 9, wherein the control element has side protuberances engaged in side openings of the motor housing.

13. (New) Electrical household food preparation appliance according to claim 12, wherein at least one of the side protuberances carries one of the detection cams provided to cooperate with the transmission element.

14. (New) Electrical household food preparation appliance according to claim 12, wherein in that the side openings are arranged in conformations provided for blocking the work container against rotation.

15. (New) Electrical household food preparation appliance according to claim 14, wherein conformations are concave.

16. (New) Electrical household food preparation appliance according to claim 15, wherein the number of angular positions in which the work container can be placed on the motor housing is comprised between two and six.
